

TABLE 1

Summary of the results of the regression analysis

The table contains 10 columns: Variable, Coefficient, Standard Error, t-Statistic, Probability > |t|, and F-Statistic. The rows represent different variables: Intercept, Age, Education, Experience, Gender, Marital Status, Income, and a constant term.

Variable	Coefficient	Standard Error	t-Statistic	Probability >  t	F-Statistic
Intercept	1.234	0.056	21.856	0.000	478.9
Age	0.012	0.003	4.000	0.000	16.0
Education	0.023	0.004	5.750	0.000	33.0
Experience	0.008	0.002	4.000	0.000	16.0
Gender	0.015	0.005	3.000	0.001	9.0
Marital Status	0.010	0.003	3.000	0.001	9.0
Income	0.005	0.001	5.000	0.000	25.0
Constant	0.000	0.000	0.000	1.000	0.000
